Volunteer work:

Every two weeks I go to a house named 'The Angel's House' to play the piano and give music appreciation lessons to the children and members there, also asmusic therapies.

The children living in the house most have autisem, some parts disable of their body, cerebral palsy, etc.,. Music helps them gets more healthy gradually and I also love to teach them to play the piano, learn the music theories as much as they like. Sharing music will help them heal enormously and I hope they will be excellent musicians in the future who are once healed by the magic of music.
